

# COMPUTER INTEGRATED MANUFACTURING SYSTEMS

## Index to Volume 7 (1994)

Number 1 (February) 1-72  
Number 2 (May) 73-144

Number 3 (August) 145-224  
Number 4 (November) 225-288

### Article index

#### Number 1

- A new adaptively weighted combinatorial dispatching rule for complex scheduling problems  
*S Tzafestas and A Triantafyllakis* 7
- Concurrent engineering approach to support CIM reference model-based FMS design  
*G L Kovács, I Mezgár and J Nacsa* 17
- Knowledge-based feature recognizer for machining  
*S-H Yeo* 29
- Using a design by features CAD system for process capability modelling  
*K Case* 39
- Automated assembly scheduling: A review  
*D Little and A Hemmings* 51

#### Number 2

- Model for production planning and control decisions at cell level: a case study  
*K V Pandya* 75
- Characteristics of methodologies for manufacturing strategy formulation  
*K W Platts* 93
- ICOS: A two-layer object-based intelligent cell control architecture  
*K H Lee and S Sen* 100
- Object-oriented methods for manufacturing information systems  
*M Zhou, R Greenwell and J Tannock* 113

### Author index

- Bajic, E. 179  
Bhattacharya, A.K. 134
- Case, K. 39  
Coleman, J.L. 134
- Edwards, K.A. 279
- Gavlcová, D. 153  
Grattan, K.T.V. 279  
Greenwell, R. 113  
Gulesin, M. 213
- Hemmings, A. 51  
Hong, H.M. 191

- Design of a flexible assembly line to control the bottleneck  
*B Pourbabai* 122
- Linking manufacturing strategy to the design of a customized hybrid production control system  
*A K Bhattacharya and J L Coleman* 134

#### Number 3

- Fuzzy knowledge-based approach to treating uncertainty in inventory control  
*D Petrovic and E Sweeney* 147
- Application of artificial intelligence to problems in advanced manufacturing systems  
*G L Kovács, I Mezgár, S Kopácsi, D Gavalcová and J Nacsa* 153
- Selection of preliminary locating and clamping positions on a workpiece for an automatic fixture design system  
*U Roy and P-L Sun* 161
- Interpretation of errors from inspection results  
*A H Rentoul, G Mullineux and A J Medland* 173
- Quality management of the manufacturing process in a CIM architecture  
*J Richard, E Rondeau and E Bajic* 179
- Hierarchy transformation method for repetitive manufacturing system specification, design, verification and implementation  
*G R Liang and H M Hong* 191

- Coordinated control of manufacturing/supply chains using multi-level techniques  
*S Tzafestas and G Kapsiotis* 206
- Face oriented neighbouring graph (FONG): a part representing scheme for process planning  
*M Gülesin and R M Jones* 213

#### Number 4

- Fuzzy multiple criteria decision model for the evaluation of AMS  
*G Perrone* 228
- Development of an intelligent inspection planning system in an object oriented programming environment  
*U Roy, Y Xu and L Wang* 240
- A functional-to-behavioural transformation framework for specification and design of manufacturing systems  
*J Zaytoon, E Niel and A Mille* 247
- Unified review of 3D model generation for reverse engineering  
*N V Puntambekar, A G Jablowski and H J Sommer III* 259
- Design for automating the inspection of manufacturing parts  
*M D Reimann and J Sarkis* 269
- Real-time computer controlled backscatter measurement of optical fibres  
*K A Edwards, M S Rizk and K T V Grattan* 279

### Book reviews 63, 142, 219

- Jablowski, A.G. 259  
Jones, R.M. 213
- Kapsiotis, G. 206  
Kopácsi, S. 153  
Kovács, G.L. 17, 153
- Lee, K.H. 100  
Liang, G.R. 191  
Little, D. 51
- Medland, A.J. 173  
Mezgár, I. 17, 153  
Mille, A. 247  
Mullineux, G. 173

- Nacsa, J. 17, 153  
Neil, E. 247
- Pandya, K.V. 75  
Perrone, G. 228  
Petrovic, D. 147  
Platts, K.W. 93  
Pourbabai, B. 122  
Puntambekar, N.V. 259
- Reimann, M.D. 269  
Rentoul, A.H. 173  
Richard, J. 179  
Rizk, M.S. 279  
Rondeau, E. 179
